AJITH SRIKANTH

Boston, MA | ajithsrikanth.f@northeastern.edu | LinkedIn

Education

Northeastern University, **Boston** Aug 2026
Master of Science in Advanced and Intelligent Manufacturing **GPA**: 3.9
Course Work: *Manufacturing Process Design Engineering, Digital Manufacturing, Leadership Program, Lean Concepts and Applications & Intelligent Manufacturing*

SRM Institute of Science and Technology, **Chennai** May 2022
Bachelor of Technology in Mechatronics Engineering **GPA:** 3.68
Course Work: Control Systems, Manufacturing Methods, and IIoTs.

Work Experience

Team Manager - Hero MotoCorp, *Haridwar & Tirupati, India* Jul 2022 - Aug 2024

- Designed and implemented Daily Management Systems (DMS) creating Excel-based analytical dashboards that consolidated breakdown data, maintenance costs, MTTR/MTBF/MTTPM metrics, and PM schedules for executive leadership, resulting in 40% increase in Overall Equipment Effectiveness (OEE)
- Conducted comprehensive data analysis using SAP and Excel to identify operational inefficiencies across manufacturing processes, translating large datasets into actionable insights that drove $67,000+ annual cost savings through targeted improvements
- Developed predictive maintenance analytics models analyzing historical equipment failure data and performance trends to reduce unplanned downtime by 83% for CNC/PLC machinery through data-driven scheduling and resource allocation
- Generated executive-level statistical reports and presentations synthesizing multi-source operational data (equipment performance, cost analysis, production metrics) into compelling visual narratives that enabled strategic decision-making for plant leadership across two facilities
- Synthesized large datasets from multiple sources (production logs, maintenance records, quality metrics, cost data) into comprehensive annual reports highlighting TPM success metrics, earning TPM Special Award for data-driven excellence in Predictive Maintenance and Zero Breakdown initiatives

After Sales Intern - Van Dyk Recycling Solutions, *Norwalk, CT* May 2025 – Dec 2025

- **Engineered comprehensive data management systems** processing 500+ equipment records across SQL Server and Azure databases, implementing advanced search algorithms with 8+ dynamic filters to consolidate data from multiple platforms and enable rapid information retrieval for cross-functional teams
- **Designed interactive data visualization dashboards** using Python and Streamlit, transforming complex datasets into intuitive network graphs, statistical charts, and real-time analytics displays that improved stakeholder decision-making efficiency by 35%
- **Built AI-powered data extraction pipeline** integrating multiple OCR engines (GPT-4 Vision, LayoutParser, OpenCV) to process 1,000+ PDF documents, achieving 92% accuracy in structured data capture while reducing manual data entry time by 80%
- **Created executive reporting framework** consolidating data from multiple platforms into unified dashboards and presentations, enabling leadership to track $200K+ in operational improvements across 13 intelligent automation systems with quantified ROI metrics
- **Developed automated data quality assurance tools** validating consistency across Azure Blob Storage and SQL databases, identifying discrepancies in 500+ records and generating comprehensive CSV reports with error analysis and corrective recommendations

Skills

Manufacturing: *Operational Excellence, Process Improvement, Daily Management Systems (DMS), Total Productive Maintenance (TPM), Lean Methodology, Automation Systems & IoT Integration*
Automation: *Simio, MATLAB, SolidWorks, AutoCAD, SAP 7.8, GX Works, Python*
Data Analysis: *SAP 7.8, Python Excel, PowerPoint & Root Cause Analysis, SQL Server*
Systems: *Windows, Linux, & Google Workspace*
Soft Skills: *Cross-functional Collaboration, Communication, Teamwork, Leadership, Problem Solving & Analytical Thinking*
